

GIS Users Meeting

Agenda
February 5, 2015

Location: Constitution Hall, 525 W Allegan, Lansing
Conference Room ConCon A – south lower level

Conference line: **877-873-8017 access code 7774472** – begins at 10:00 AM

Timeline:

9:30 – 10:00 Networking (Coffee, bagels, muffins provided)

10:00 – 12:00 Morning Session

- I - Introductions and Approval of Meeting Minutes
- II - Federal, State, and Association Updates (5 minutes each)
- III - Local, Regional, Vendor Partners, Other Updates (2 minutes each)
- IV - Special Topic
- V - Other Items, and Conclusion

12:00 – 1:30 Lunch on your own.

1:30 – 3:30 Educational Session.

Morning session Special Topics:

1. Introduction of Mark Holmes, Center for Shared Solutions Geospatial Services Manager
2. The Enterprise Information Management (EIM) program was initiated by Executive Directive in November, 2013.

http://michigan.gov/documents/snyder/ED_2013-1_439597_7.pdf

Location information has been identified by the EIM Steering Committee as a master data element. Due to the demand for address points, a statewide address database has been identified as the initial focus. CSS staff are involved in architecting a Master Address Repository (MAR) to be used to house authoritative addresses and their location.

This session will introduce the project and discuss next steps.

Discussion will center on potential:

- Partnership opportunities with local agencies to participate in providing authoritative structure points.
 - Benefits of a comprehensive statewide address database and participating in the program.
 - Challenges and requirements of the creation and maintenance of structure points to determine how the project can assist in establishing a statewide layer.
-

Afternoon Educational Topic: **GIS and the SAW (Stormwater, Asset Management, and Wastewater) Grants.**

Presented by: Valorie White, Project Manager, Michigan Dept. of Environmental Quality
Jim Bennett, InfoGeographics, Inc.
Ed Dempsey, Prein&Newhof

Valorie will provide the background and current status of the grant program.

Jim will discuss various topics related to the State of Michigan's SAW Grant program. This includes an overview of the SAW Grant program, what the grants allow, and what standards are necessary to comply with them. IGI will then discuss and demonstrate how GIS is being utilized along with our engineering company partners and the local communities to deliver high quality SAW program results and deliverables.

Ed will talk about the trials, tribulations and successes involved in managing the mapping and data collection efforts for 11 SAW grant communities. We'll take a look at both the tech and human sides of this effort.
